Profile

Software Engineering student (Dual Degree, Ain Shams University & University of East London – 2026) with hands-on experience in **backend and full-stack development**. Strong background in **RESTful API design, Spring Boot, OOP, and secure application development**. Experienced in building secure, real-world backend systems using modern software engineering practices.

Professional Experience

- 2025/07 – 2025/08

Backend Development Intern — Qeema
 - Contributed to backend development projects using **Java and Spring Boot**.
 - Participated in API design discussions and backend code reviews within the team.
 - Used **Git** for version control and team collaboration.
- 2024/10 – 2025/06

React Frontend Development Training — Digital Egypt Pioneers Initiative (DEPI)
 - Built responsive front-end applications using **React, TypeScript, and Bootstrap** following clean code and testing practices.
 - Collaborated in a team environment using **Git/GitHub**, with exposure to **Node.js** for backend integration.
- 2024/07 – 2024/07

Full Stack Intern — Giza Systems
 - Developed responsive web interfaces using **HTML, CSS, JavaScript, Bootstrap, and PrimeFlex**.
 - Implemented front-end components with **Angular** and backend logic using **C#/.NET**.
 - Built and integrated **RESTful APIs** and managed data persistence with **Entity Framework**.

Education

- 2022 – present
Cairo

Bachelor of Computer Science (Software Engineering Major)
Ain Shams University & University of East London
Currently pursuing a dual degree, expected to graduate in 2026.

Skills

Programming Languages:

- Java, C#, Python
- C++
- C (AVR)

Frontend Development:

- HTML5, CSS3, JavaScript, TypeScript
- React, Bootstrap, PrimeFlex

Version Control & Tools:

Git, GitHub, GitLab, Visual Studio, VS Code, IntelliJ

Embedded Systems & IoT (Academic):

Microcontroller Programming (AVR in C), Arduino, Basic IoT Prototyping

Backend & API Development:

- Spring Boot, Spring Security (JWT, RBAC), JPA/Hibernate
- .NET Core, Node.js
- REST API Design & Documentation (Swagger/OpenAPI)
- SQL (PostgreSQL, Oracle), Schema Design, ERD

Software Development Concepts:

Object-Oriented Programming (OOP), SOLID Principles, Design Patterns (MVC), Clean Architecture

Automation & Process Optimization:

UiPath (Workflow Design, Task Automation)

Projects

2025/11 – Present	Freelance Backend Developer – Government Relations System <i>Spring Boot, Spring Security, PostgreSQL, Docker</i> • Built a secure Spring Boot REST API with JWT authentication and RBAC as a freelance project. • Modeled relational data using JPA/Hibernate and DTO-based architecture. • Containerized the backend using Docker and prepared it for deployment.
2025/08 – 2025/08	CampusPulseAI - University Event & Club Organizer Platform <i>Backend Intern at Qeema Java</i> Developed backend with Spring Boot & Spring Security, designed and documented REST APIs using Swagger, integrated OpenAI for personalized recommendations, and managed media storage with Cloudinary.
2025/02 – 2025/05	Fitness Tracker Website <i>DEPI Frontend Training Project Digital Egypt Pioneers Initiative (MCIT)</i> Built a full-stack workout tracking app using React, TypeScript, and Node.js with RESTful APIs and unit testing.
2025/03 – 2025/05	Evidence Automation System — UiPath, RPA Automated PDF email distribution with Outlook integration, including data extraction, logging, and error handling.

Additional Academic Projects

- **Fitness Tracker Website** — React, TypeScript, Node.js Built a full-stack workout tracking application with RESTful APIs and unit testing.
- **Sounds Packing Application** — Python, Optimization Implemented bin-packing algorithms to efficiently group audio files under time constraints.
- **Crime Prediction in Chicago** — Data Science, ML Applied classical ML models (Logistic Regression, SVM, KNN, Decision Trees) with a GUI for prediction and visualization.
- **Online Bookstore** — Java Web Application Built a Java-based platform for customers and admins using design patterns and UML documentation.
- **Simple Digital Wallet** — C++ Implemented authentication, transaction handling, and file-based persistence using core data structures.
- **Spotify Data Management System** — C#, Oracle Created a desktop application with Oracle DB integration, Crystal Reports, and UML/SRS documentation.
- **Facebook App (Simulation)** — Java OOP Built a social media simulation applying OOP principles, file handling, and UML design.
- **Auction Management System** — Database Project Designed and implemented a relational database using Oracle SQL Developer with ERD, schema, and forms-based UI.

Extracurricular Activities

2023/10 – 2024/05	Operations Committee Member — Applai Student Activity, ASU Organized and coordinated student events, strengthening teamwork and communication skills.
2023/07 – 2023/08	UpSkill Program Participant — iCareer & ASU Career Center Developed professional skills including communication, presentation, and networking.
2022/10 – 2023/05	Game Development Committee Member — Support Student Activity, ASU Collaborated on building interactive games using C++ (SFML), focusing on game mechanics and performance.
